injuries. Petition at 1, 4-5. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On March 29, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent concluded that Petitioner's claim meets the Table criteria for SIRVA. *Id.* at 10. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction in the affected shoulder prior to intramuscular vaccine administration that would explain the alleged signs, symptoms, examination findings, and/or diagnostic studies occurring after vaccine injection; she more likely than not suffered the onset of pain within forty-eight hours of vaccine administration; her pain and reduced ROM were limited to the shoulder in which the intramuscular vaccine was administered; and there is no other condition or abnormality present that would explain [P]etitioner's symptoms." *Id.* Respondent further agrees that "this case was timely filed, that the vaccine was received in the United States, and that [P]etitioner satisfies the statutory severity requirement by suffering the residual effects or complications of her injury for more than six months after vaccine administration." *Id.*

**In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.**

**IT IS SO ORDERED.**
